My Portfolio: sumskoy.dev
My phone number: +7-707-113-5854

Languages I speak: Russian (native), English (C1, full professional proficiency)

Summary

I'm a seasoned Frontend developer with rich backend experience and a solid 6-year track record in the industry. My expertise lies in JavaScript and React for frontend development, and I am also well grounded in Ruby and Node.js for backend implementation. I have successfully navigated diverse project landscapes, managing tasks of varying complexities. My commitment to delivering high-quality solutions is rooted in a problem-solving mindset and a strong sense of accountability. I thrive in dynamic environments, consistently providing innovative and efficient solutions that go above and beyond client expectations.

Experience

Lead Frontend Developer, Full-Stack Engineer
Methodical Platforms
December 2021 - September 2023, USA

- Led the frontend development of the company product
- Utilized cutting-edge technologies to improve website performance and enhance user experience
- Developed and maintained the backend of the company product using Java, resulting in stable and reliable infrastructure for processing big sets of data
- Identified and resolved technical issues in the backend and frontend codebase, reducing system downtime and improving overall user experience and system stability
- Developed a JavaScript framework wrapper for Excel-like tables, resulting in a 30-40% increase in data manipulation efficiency
- Conducted thorough code reviews and provided actionable feedback to improve code quality and maintainability

Frontend Developer, Full-Stack Engineer
University of Washington

March 2020 - March 2021, USA

- Participated in design and architecture planning of the project and provided key ideas
- Was in charge of the backend implementation, API and frontend integration
